

"I AND MY FATHER ARE ONE"
John 10:30
Teaching by Mary Lou Houllis

Jesus Christ came to reveal and demonstrate a deep mystery, that God was indeed incarnated in the flesh of man. He stated, "I and my Father are one." The religious of his day said he spoke blasphemy so they stoned him and ultimately this declaration led to his death. Today, two thousand years later, we can begin to understand the words which have echoed down through the ages, as Christ answered his adversaries, "Is it not written in your law, I said, Ye are gods?" (John 10:34) He was teaching a truth which could not be proven nor fully understood until the day which you and I have entered. You see this truth has now been discovered by the scientific community!

Life's deepest mysteries have been found in the most unlikely place, in the discovery of the chemistry of life our DNA. A clue to the mystery of our origin has lived within us all along and can now be proven! Scientists have found a coded message within the molecules of life. Deep within the DNA, in every cell of our bodies, regardless of religion, race, heritage, gender or lifestyle, is the same message. The timeless message which Christ gave so long ago, has now been revealed through our DNA. It is a biblical alphabet that links to our genetic code.

The basic elements of our DNA are hydrogen, nitrogen, oxygen, and carbon. When these words are translated and replaced with key letters of the Hebrew and Arabic alphabet, they spell the ancient name of God. This has revealed that our DNA may be read literally as a translatable alphabet within each of our cells. The code of all life can now be transformed into a message to mankind of our true identity and origin. When translated the message reveals that the precise letters of God's ancient name are encoded as the genetic information in every cell of our bodies. The way the message reads is: "God/Eternal within the body." How profound!

Do we realize this discovery has been waiting from the dawning of creation until this day to be revealed? We can now understand what Christ said over 2,000 years ago was literal truth....we are gods and the Father and I are one! All mankind is one family, united through a common heritage of God. Through this discovery we can now begin to look at our fellowman through our common origin instead of through our differences!

Within each cell of the estimated six billion inhabitants of our world, the message is repeated for us today again, and again. That message tells us God is our origin and the building block of our existence. The code is so universal that it produces the identical message when translated into either Hebrew or the Arabic language!

Can we begin to see in this day God is unveiling for us, we are truly one with Him and each other? In John 17, just before his crucifixion Jesus Christ spoke a great revelation about oneness. In verse 23 he said; "I in them and thou in me, that they may be made perfect in one and that the world may know that thou hast sent me, and hast loved them, as thou hast loved me." Our perfection comes in the knowledge of our oneness with God and each other. This new scientific knowledge that all life is made from the chemical equivalent of a single name gives us an insight into what Christ was revealing to us. With such tangible proof of a common bond, we are given a reason to look beyond the issues which may have separated us in the past. We are called to put down our differences and

begin to see all men clearly, created In the image of God!

Truly, what a wonderful day we have entered! We are awakening from the Adamic dream that we have ever been separated from God or one another and coming to the revelation that the power of heaven is within us...within our very DNA. What can stop that power? Christ said the Kingdom of heaven is within you...all of creation is waiting for you to walk in that power!
